(b) Transfer records, digests and indices relating to any patent application not yet accepted or refused which is open to the public in accordance with point 1.11 or for which copies or access may be made available in accordance with point 1.14 shall be made available to the public. The Office will not open a public inspection of only certain parts of the designation document. If such a document contains two or more elements, one of which, if one, would be open for such a check, the whole document will be opened. Thus, if the document includes either a trade mark or a patent, in addition to one or more patent applications, it will be made available to the public as a whole, and if it includes several patent applications, it will be available as soon as any of them is published or patented. Documents relating to only one or more pending patent applications which have not been published in accordance with point 25 of U.S.C. 1.220) will not be made public. Applications for copies of patents before 1957 should be sent to the National Archives and Records Administration (NARA). Since these records are maintained by NARA, nara would rather request copies directly from NARA rather than from the Office, which should then redirect the requests to NARA. Nara's payment of the fees required should be accompanied by all requests for copies.
